THE FORMATIVE YEARS: 1955-1960

1957 ADVANCE PROGRAM

1957 TRANSISTOR AND SOLID STATE CIRCUITS CONFERENCE

SPONSORSHIP AND SCOPE

The 1957 Transistor and Solid State Circuits Conference is sponsored jointly by the Philadelphia Section of the Institute of Radio Engineers and the Technological Division of the AIEE, the IRE Professional Group on Circuit Theory, and the University of Pennsylvania. Patterned after the previous Conferences held at the same location for the past several years, this Conference will include information on both linear and nonlinear transistor and hybrid circuits and amplifiers, as well as application of solid-state circuits, including·circuits-electronics and magnetic cores. Two tutorial sessions are aimed at surveying recent advances in the subject and will provide the practicing engineer in solid-state circuitry a broader picture of the state of the art.

LOCATION

The Conference will be held on the Campus of the University of Pennsylvania, in the Irvine Auditorium and the University Museum. Irvine Auditorium is located on the northwest corner of 34th and Spruce Streets, Philadelphia, Pennsylvania. The University Museum is on the southeast corner of 36th and Spruce Streets. Both buildings Figure 42 provides convenient transportation between the University Campus and Spruce Street Station of the Pennsylvania Railroad. The Spruce Street Station of the Pennsylvania Railroad is less than a mile from the Campus.

ACCOMMODATIONS

The Belvoir-Strait Hotel, Broad and Chestnut Streets, has reserved a block of rooms for those attending the Conference. For those who do not wish to participate in the Conference on Thursday and Friday at the Cockpit-Buffet on Thursday night, Pennsylvania offers many fine restaurants.
